

**Multilayer insulating and heat releasing sheet - contg. silicone rubber,
boron nitride and reticulate insulator**

Patent Assignee: DENKI KAGAKU KOGYO KK (ELED)

Number of Countries: 001 Number of Patents: 002

Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
JP 59064355	A	4		

Abstract (Basic): JP 59064355 A

The sheet consists of sheet of silicone rubber (1 pt.wt.) and BN (2 pts.wt.) having graphitisation index less than 20 and crystal lattice size more than 5 angstroms and one or more reticulate insulators (e.g. glass fibre sheet or glass fibre cloth having good electrical insulation and tensile strength) on the surface and/or inside of the sheet.

A large amt. of BN can be mixed with silicone rubber without decrease in properties of the rubber so that a sheet having good thermal conductivity and electrical insulation can be produced. It is used in heat-generating electronic components e.g. power transistors.

Title Terms: MULTILAYER; INSULATE; HEAT; RELEASE; SHEET; CONTAIN; SILICONE;
RUBBER; BORON; NITRIDE; RETICULATED; INSULATE

Derwent Class: A85; P73

International Patent Class (Additional): B32B-007/02; B32B-025/20;
B32B-033/00; H01B-003/46

File Segment: CPI; EngPI
